

Bob Simon Senior Geologist/Environmental Scientist

Qualification Summary

Bob Simon, a Certified Professional Geologist with the American Institute of Professional Geologist (CPG 9155), has over 30 years of experience in geologic, hydrogeologic and geophysical design, investigation, field implementation and instruction. His expertise includes groundwater exploration and planning, Subsurface characterization, delineation of Plume migration utilizing hydrogeologic and geophysical techniques, site assessments, closure plans, regulatory compliance and remediation planning.

Experience

Mr. Simon has served as project manager and/or scientist-of-record (geologist, geophysicist, hydrogeologist) on a wide array of hazardous waste, solid waste, water resource and other projects, including:

- Underground Storage Tank Assessments and Removals
- Wellhead Protection Plans
- Landfills
- Methane Gas Monitoring
- Property Transfer Assessments
- River Sediment Characterization
- Hazardous Waste Facility Closure Plans
- Quality Assurance Project Plans and Healthy & Safety Plans
- Remediation Planning and Implementation
- Groundwater Resource Investigation
- Well field Exploration
- Contaminated Site Assessments

Education/Training

M.S., geology/Geophysics, Wright State University, 1984

B.S. Geology, Youngstown State University, 1982

40-Hour OSHA Health and Safety Training for Hazardous Waste Operations

Various Ground Penetrating Radar, Seismic refraction/Reflection, Electromagnetic Induction, Resistivity and other Courses.
